EDUCATION

Swarthmore College

Swarthmore, PA

B.A. in Computer Science, GPA: 3.7/4.0

Expected May 2027

Relevant Coursework: Computer Systems, Data Structures and Algorithms, Computer Networks, Artificial Intelligence, Human Computer Interaction, Social Computing, Open Source Software Development, Computer Graphics

EXPERIENCE

Software Engineering Intern, Full-Stack

June 2026 – Aug 2026

Shinkei Systems

Los Angeles, CA

- Led ground-up redesign of a company-wide internal platform for data analysis, influencing daily business decisions
- Deployed full AWS stack utilizing EC2, ECS, RDS, Lambda supporting 100+ employees
- Built an efficient pipeline for 1M+ events a day, reducing ETL processing time by over 95%

Computer Science Teaching Assistant

Sep 2025 – Aug 2026

Swarthmore College

Swarthmore, PA

- Delivered multiple lectures on topics including: introduction to Docker, packaging and deploying web apps with Docker, and introduction to React
- Assist Professor Sukrit Venkatagiri in teaching and grading for Social Computing course, influencing course development

Club President | SysAdmin | Treasurer, Full-Stack Engineer

Sep 2023 – Present

Swarthmore College Computer Society

Swarthmore, PA

- Lead student-run club focused on developing free software to address campus-wide challenges, managing all aspects of club operations and strategy
- Manage enterprise-grade hardware, overseeing 3+ server deployments handling 4K+ daily active users via Proxmox, coordinating 120TB of storage, comprehensive backup strategies, self-hosted DNS, and multi-GPU AI cluster
- Allocated and managed annual budget of \$10K+, ensuring resources are distributed effectively across server maintenance and software projects

PROJECTS

Corridorkey.cloud | *Docker Swarm, CI/CD, DevOps*

- Enabled a fully self-hosted, cloud-independent GPU compute platform for 2,000+ users by designing and deploying production infrastructure end-to-end, including DNS, mail, and edge security
- Designed multi-node swarm cluster backed by GitHub Actions for automatic, zero-downtime deployments
- Reduced abusive traffic and account-creation attacks to near-zero by deploying CrowdSec for real-time detection alongside Traefik-based mitigation, in direct response to a live security incident

Budget Buddy: Swarthmore | *React Native, Expo, App Store Connect*

- Co-founded React Native budgeting app that captured 2,000 App Store impressions in the first two months
- Developed a working GET Mobile integration through reverse engineering the college's ID/payment-management app, overcoming the lack of a public API

Swarthmore Course Planner | *Docker, TypeScript, Next.js, PostgreSQL*

- Streamlined class scheduling through a complete redesign of the previous course planner, resulting in a 400% user increase up to 500 active users per semester
- Optimized performance, reducing total blocking time by over 10× through efficient API route handling and high-performance database queries
- Aggregated and normalized data from multiple sources (Rate My Professor, official course listings, and user-generated reviews) into a unified user experience, increasing platform engagement and time-on-site

TECHNICAL SKILLS

Languages & Frameworks: TypeScript/JavaScript, Python, HTML/CSS, React, React Native, Next.js, Node.js

Infrastructure & Tools: Docker Swarm, Git, GitHub Actions, AWS (EC2, RDS, Lambda)
